Methodology: Anonymised microdata and a detailed research note explaining the methodology are available at <https://github.com/robertocerinaprojects/PoSSUM>.

- Subject Pool:
 - \mathbb{X} Users;
- Subject Features' Extraction:
 - LLM (**gpt-4o**) deduction based on user-level unobtrusive observation of \mathbb{X} profile and timeline;
- Digital Fieldwork:
 - 17/10/24 to 26/10/24;
- Sample Size:
 - 1056 \mathbb{X} Users;
- Sampling:
 - Quota Sampling -
 - * Cell-quotas for joint distribution of Gender (2), Race/Ethnicity (6); Age (6); Household Income (5), 2020 Vote (6);
 - * Target sample size = 1,500;
 - * Stop-rule = expected new users per-day ≈ 10 threshold;
- Stratification Frame:
 - American adults according to the 2021 ACS microdata, extended by 2020 US Election results;
- Weighting Method:
 - MrP -
 - * Individual-level Covariates:
 - Gender (2);
 - Race/Ethnicity (6);
 - Age (6);
 - Household Income (5);
 - 2020 Vote (6);
 - State (54, Nebraska + Maine CDs treated separately);
 - * State-level Covariates:
 - 2020 Vote Share;
 - 3rd party fielding candidate dummy;
 - * State-level by Individual Covariates Interactions:
 - Ind. 2020 Vote (6) by State 2020 Vote Share.
- Reporting:
 - The Median and Lower / Upper 5%/95% estimates are reported for each crosstab.

State-Level Estimates

Fieldwork 10/17 to 10/26

Figure 1: Comparing PoSSUM's latest state-level estimates of Trump's % margin over Harris against: [left] the Uniform Swing model, assuming popular vote estimates according to the FiveThirtyEight model; [right] the FiveThirtyEight State-level Forecast estimates. If PoSSUM's estimates perfectly match the benchmarks, we would see a perfect set of dots on the $y = x$ line. Relative to the benchmarks, Bias, RMSE, Correlation, Coverage and % Agreement on who would win the state are presented in the legends. States for which PoSSUM and the benchmarks disagree are highlighted in bold font. Positive bias indicates that PoSSUM is over-estimating the Trump margin over Harris, on average across states, relative to the benchmarks.
